

Sealing Corporation: Company Profile

Formed in 1973, Sealing Corporation has evolved into a diversified Sealing Technology Company and now services a multitude of industries worldwide.

To expand its market share, Sealing Corporation has contracted globally with several experienced and competent distributors and has entered into various marketing collaborations with well known international Sealing Technology Leaders.

Sealing Corporation: Products

Sealing Corporation has designed and manufactured a full line of self-energized metal gaskets consisting of a corrugated metal carrier combined with different Soft Sealing Inserts (e.g. Flexible Graphite, PTFE, Mica, or combination thereof).

These gaskets are used in extremely difficult applications, for Cryogenic and High Temperatures (200°C To + 1'200°C) and High Pressures (400bar). Based on the gasket's unique design, they are blow-out and fire proof.

Sealing Corporation: Production Quality

SELCO SEAL Gaskets (and STEEL TRAP Gaskets-Trademark of Chesterton) are manufactured in the USA. They meet the highest quality standards in the industry. They have undergone periodic Domestic and International Performance and Fugitive Emission Tests and are certified and approved by several national and international institutions.

Sealing Corporation: Expertise and Competence

In addition to supplying innovative, proprietary SELCO SEAL gaskets, Sealing Corporation, along with its distributors, can also assist its customers on difficult and unusual applications.

Furthermore, Sealing Corporation can offer custom-made gaskets designed to meet customer's specific requirements.

Sealing Corporation: Contacts

We welcome the opportunity to assist customers and distributor in the design and development of complete flange sealing systems including live loading. For more information, please refer to the contact information provided.
